Passionate, intelligent and a very adaptive mind that can grasp concepts very quickly, despite being burdened by family responsibilities aspire's to achieve his true potential.

Education:

2012	Secondary school (10 th class) from : GD GOENKA PUBLIC SCHOOL ,NEW DELHI
2014	Completed Higher secondary school (12 th class) from : GD GOENKA PUBLIC SCHOOL,NEW DELHI, with: PHYSICS, CHEMISTRY, MATHS, ENGLISH , PHSICAL EDUCATION AS CORE SUBJECTS.
2019	Accomplished Bachelor's in Business Administration (B.B.A) from: Bharati Vidyapeeth University (full time)

Activities:

- To start with, I had a curious and industrious mind from the very beginning which enabled me to work as well as study, initially I started in my Father's company JAY MANGAL INDUSTRIES that is a plastic disposable's manufacturing company, there I easily managed to boost sales and revenues, by understanding the science behind manufacturing, and applying eco – friendly ways to gather sales such as adding an aluminum division to manufacture disposables!! But after the Blanket ban on Single use Plastics around JULY of 2019 all around the globe, I transitioned to medicine industry where I acquainted myself with sciences, which were and are my long lost love.
- After rigorous effort, I was able to setup my very Own pharmacy under the name of SAVERA MEDICINES which commenced operations from 15th September 2019, in the state of Bihar ,inside the SAVERA CANCER AND MULTISPECIALITY HOSPITAL, that was inaugurated my the current vice president of India Shri M. Venkaiah Naidu. Here I got exposure to great technologies and softwares such as E-clinic works , Mako softwares. Because of my fast learning abilities this business grew generating revenues of approximately four crore INR in the FY 20-21.
- Currently, I am also employed as Tech and Marketing strategies advisor at Appopener.com, due to COVID-19 and work in home culture, I am able to invest a decent amount of time in this startup, and it is a very innovative website that is aimed at creator empowerment. This has given me a lot of knowledge about database management and real-life operations involved to upscale and downscale a website, and also has familiarized me with modern computing languages like react and python.
- Recently, I also managed to get an EIGHT (8) band in the IELTS EXAMINATION with the least being 6.5 in writing, in the first attempt only.
- Lastly I am also enrolled in the CS50 course on the Harvard Ed x platform, pursuing my interests independently and self- sufficiently.

Interests:

- I have a great knack for computer sciences as I was one of the founders of Loginskip.com and appopener.com. These sites encounter traffic of about five million people per month. I also havein depth knowledge of AutoCAD, Adobe premiere pro, adobe Photoshop and Microsoft word, PowerPoint and excel that have helped me to explore Professional Video Editing and becoming a data science enthusiast ,who has worked with prominent figures in this industry.

Extra curricular:

- My current job is in the medical field which has provided me with good knowledge and practical skill on how to approach a patient, administer vaccines, and how to keep self- safety around COVID patients or entire Corona wards for that matter, and maintain COVID standards as my workplace is NABH certified and has strict measures that have to be followed at all times ,all of which remind me of the need and importance of science in the contemporary world.
